

April 27, 1926,

Mr. C. W. Sorensen,  
Mt. Pleasant, Utah,

Dear Sir:

*Turn + cedar creek.*  
RE: ~~SANPITCH~~ DISTRIBUTION.

I am in receipt of your letter of April 26th, and realize the advantages of having some outside man to take care of distribution.

It is still possible that I can locate such a man and in the meantime I wish you would let me know the approximate acreage covered by this distribution and how strong an assessment per acre it will stand. I need not point out to you that competent men are always scarce and I cannot arrange for that kind of assistance without proper compensation.

As to the errors in the Proposed Determination, I would say that conditions down in SanPete are such that I did not expect anything else. On the rest of the river I had a local committee to advise as to the claims, but I felt that such a committee from SanPete would probably have as hard a time as my own engineers did.

Yours very truly,

State Engineer,

GMB:M
